

BonsaiBakery Plant Care Guide

Quickstart

Using the provided BonsaiBakery Water Bottle (250ml), fill it with water to the 250ml mark. This provides approximately:

- 2 waterings for medium-sized plants.
 - 4 waterings for small-sized plants.
-

Watering Based on Environmental Conditions

Environmental Considerations

- **Increase Watering:** If the plant is in a warm, dry, or brightly lit space.
- **Decrease Watering:** If the plant is in a cooler, dimly lit area.

Ideal Conditions

- **Temperature:** ~75°F
 - **Humidity:** ~50% relative humidity
- Adjust watering as needed for deviations from these conditions.
-

Watering Guidelines Based on Temperature & Humidity

Temperature	Humidity	Water Volume (% of Soil)
70-75°F	30-40% RH	35-40%
75-80°F	25-35% RH	40-45%
80-85°F	20-30% RH	45-50%

Soil Moisture Guide

The soil should always retain slight moisture:

- **Too Dry:** Adjust to more frequent watering.
- **Too Wet:** Space out watering to allow proper drainage.

Pest Management

To keep your plants healthy:

1. **Routine Care:** Use OMRI-compliant pest solutions.
2. **Recommended Products:**
 - Growers Ally Crop Defender 3
 - Growers Ally Fungicide
 - Neem Meal-infused soil
3. **Preventative Measures:** Regularly rotate pest control treatments to ensure plant resilience and health.

Specific Watering Guidelines by Pot Size

Pot Size	Soil Weight (grams)	Standard Watering (ml)	Post-Wilt Max (ml)
XS (Nano)	Up to 120g	Up to 50ml	Max 100ml
SM (Small)	237g	Up to 75ml	Max 150ml
MD (Medium)	474g	Up to 150ml	Max 250ml
LG (Large)	948g	Up to 250ml	Max 500ml
XL (Extra Large)	1185g	Up to 300ml	Max 600ml
XXL (Double XL)	1422g	Up to 420ml	Max 750ml

Additional Tips

- Always use **room-temperature water** for watering.
- Regularly inspect plant health and adjust care practices as needed.
